

# Homes Under 2000 Square Feet

Choose from one of our designs or your own ideas. All we require is a rough sketch with dimensions and log walls clearly marked in order to give you an accurate log work quote.

Our designer would be pleased to work with you to custom design a home that is suited to your individual needs. A complete set of custom designed blueprints is .79 cents per square foot. This cost will later be deducted from your contract price.

You will receive 5 sets of complete construction drawings including elevations, detailed floor plans, foundation plans, site plan, cross sections and electrical layout.
